Second section 60 of two piece housing 20 includes an elongated stepped housing portion
62 having an upper surface 64 and a stepped lower surface 66 having a multiplicity of step
sections. In the embodiment illustrated in Figures 1 and 2 there are four stepped sections 68, 70,
72 and 74 in lower surface 66 with each successive stepped section formed at a greater angle to
the horizontal upper surface 64 than the preceding stepped sections. The upper surface 64 is
initially horizontal at the innermost portion 69 of second section 60 and then tapers at angle
portion 65 until it once again converts to a an outermost horizontal portion 67 against its
outward end 76, the outermost horizontal portion 67 positioned lower than the innermost
horizontal portion 69 64. Second section housing portion 62 also has a first sidewall 78, a
parallel oppositely disposed second sidewall 80.
